PRODUCT INFO SHEET

What is the FuelBox?

The FuelBox is a UN approved 20 litre bag in box Red Diesel/Gas Oil fueling system. It contains a specially formulated additive system 10-Plus, which achieves outstanding performance over conventional Red Diesel/Gas Oil.

What vehicle / equipment can I use FuelBox for?

FuelBox can be used in many applications, including: mobile cranes and diggers, dump trucks, tractors, boats, cement mixers, forklift trucks, lawn mowers, generators and much more.

What is Gas Oil 10-Plus?

Gas Oil 10-Plus is a specially formulated additive system included inside every FuelBox, achieving an outstanding performance over conventional Red Diesel / Gas Oil. With improved Cetane ratings boosting power and reducing deposit and varnish build-up. This product also improves combustion efficiency and fuel consumption, reducing visible emissions. It will also protect against premature wear in fuel pumps and injectors and enhances the performance of older engines. FuelBox also contains emulsifiers to combat water build up preventing emulsions forming and filter blockages.

What are the transport regulations for FuelBox?

The haulage of Red Diesel falls within the scope of ADR requirements and the transportation of the FuelBox solely for resale to customers does require ADR compliance, however there are certain exemptions. For example anyone who transports FuelBoxes as an ancillary activity to their main trade or business can be exempted from ADR as long as the quantities carried are less than

1,000 litres. For further guidance please [click here](#) and refer to section 1.1.3 Exemptions.

Is the packaging environmentally friendly?

Yes! The FuelBox reduces packaging waste in landfills by 86% and reduces plastic consumption by up to 90%, compared to 20-liter rigid packaging. The used pack splits into two parts firstly remove the plastic bag element and dispose of in accordance with current waste regulations, the corrugated box can then be disposed of in dry paper/cardboard recycling.

Do I need to be HMRC RDCO registered to buy or sell the FuelBox?

If you only supply and receive oil in pre-packed containers not exceeding 20 litres, you are excluded from the scheme. For further guidance [click here](#) to visit HMRC website. Excise Notice 192: registered dealers in controlled oil (Exclusions section note 3.1 and 3.2).

Can we store FuelBox in our retail shop?

As with any flammable liquid you must insure the safe handling and storage of the FuelBox, adequate storage facilities should be catered for. All storage facilities will be different. As a further guide please see the [Safety Advice For FuelBox Retailers](#).
